

Real-Time Admission Review Service 24/7/365

Prospective Admission Review provides appropriate determination of medical necessity prior to patient admission

Fortify Your Hospital's Compliance with State, Federal and Commercial Payers

Unique to the industry, our two-tiered approach to admission review for medical necessity provides a cost-effective solution to the challenge of providing 24/7/365 coverage.

Tier I

Our experienced nurse reviewers use the latest web-based versions of Interqual® and Milliman® evidence-based review criteria and provide a recommendation on average within 30 minutes or less of receiving your request and supporting clinical documentation. 80% of cases will fall into our cost-effective tier 1 solution.

Tier II

Our seasoned physician reviewers are available 24/7/365 to communicate with your medical staff to provide a peer-to-peer review when necessary, and also provide ongoing education programs.

"In today's ever-increasing regulatory environment, our ED physicians recognize the value of review. PHS' approach to 24x7 admission review has enabled us to increase compliance."

Michael Bessette MD, FACEP
Chairman, Department of
Emergency Medicine
